(54) Title: **DEVICE AND METHOD FOR MANAGING MULTIMEDIA CONTENT IN PORTABLE DIGITAL APPARATUS**

(57) **Abstract:** The present invention relates to a device and method for managing multimedia content in a portable digital apparatus. An object of the present invention enable management of multimedia content to be stored in a portable digital apparatus equipped with a camera based on a user's preference by configuring an index for predetermined multimedia content stored in the portable digital apparatus. To this end, a device for managing multimedia content in a portable digital apparatus, comprising a storing unit for storing a plurality of multimedia content; an input unit for receiving index information from a user so that the multimedia content are classified; and a control unit for producing index information for the multimedia content with the configured indexes. The present invention provides a method for managing multimedia content by grouping the multimedia content according to his/her preference and storing them, thereby providing quick, convenient searches for the desired multimedia content.
